

KOP-3 Series

Kiosk Printers

- Toshiba's compact, powerful and super fast receipt printers integrate into kiosk applications.
- Suitable for on-demand printing of payment, transport, registration and admission receipts
- The perfect fit for applications such as digital kiosks, interactive terminals, vending machines.
- Choose Toshiba kiosk printers for reliability, the highest quality and peace of mind.

The ever-changing workplace

Delivering reliability to meet future challenges

Every business is unique. That's why Toshiba offers the most reliable print solutions that meet all your labelling requirements, day after day. Toshiba label printers provide connectivity and solutions to adapt to the needs of an ever-changing workplace.

Toshiba's receipt printers continue to deliver on our promise of Together Information – our commitment to collaborate with clients to provide tailored, cost-effective solutions that meet your evolving workplace needs.

Compact design, strong performance

Toshiba's integrated kiosk printer series consists of a range of compact models. The integrated and efficient design of the devices ensures super-fast performance, high print quality and exceptional reliability.

Highest reliability for your kiosk solution

Space-saving devices, tailored to the kiosk

The KOP-3 range consists of four different compact models in 3 different sizes to ensure that the printer fits perfectly in your kiosk. The clever design of the optional paper roll holders ensures the printer can be integrated into those systems even where space is at a premium. The integration possibilities are endless!

Reliable printing solution for any environment

The KOP-3 kiosk printers are designed to work continuously. They are extremely durable in even the most diverse environments such as retail, digital reception in hospitals, visitor registration or check-in and many more. The reliability of these compact integrated print modules also make them the perfect fit for the payment industry, the events sector and parking machines.

Anti-paper blocking system and presenter

All devices include an anti-jam function to prevent paper blockages. The KOP-3S01's advanced anti-jam feature prevents users pulling or blocking the receipt. Once the transaction is complete, the receipt exits from the printer for the customer to take. If not taken from, the kiosk can retract the receipt to protect potentially confidential information.

Maximum performance

With print speeds of up to 12 inches per second the entire printer range is designed for the most demanding applications where the efficient throughput of customers is critical. This is further enhanced with an unmatched speed of 40 inches per second of the ticket/receipt presenter which ejects receipts just in the blink of an eye.

Key highlights

- Top print speed up to 12 ips
- Advanced anti-jam function
- Designed, developed and built by Toshiba
- Ultra reliability for peace of mind
- High performance for enhanced customer throughput
- Compact & modular design
- Low total cost of ownership

Specifications

Models

With presenter	<u>KOP-3S01</u>	
Dimensions	125.3 x 154.7 x 108.4 mm	
Weight	1.16 kg	
Connector	3-pin Molex	
Without presenter	<u>KOP-3S02-B3</u>	<u>KOP-3S02-J2</u>
Dimensions	125.2 x 107.2 x 108.4 mm	124.7 x 143.1 x 93.5 mm
Weight	0.9 kg	1 kg
Connector	3-pin Molex	2-pin Molex
	<u>KOP-3S06-E3</u>	
	125.2 x 107.2 x 108.4 mm
